

# MATH IN EUROPE

*Study Abroad at Jacobs University!*

## *Math at Jacobs*

- › Flexible selection of courses in pure and applied mathematics
- › Opportunities for student research, interdisciplinary learning, and many extracurricular activities
- › Small classes with individual attention

## *Program Particulars*

- › 1–2 semesters during junior or senior year
- › Credit transfer agreements with U.S. Institutions
- › Comfortable on-campus accommodation
- › Program participants take regular classes with highly motivated fellow students from Europe and around the world
- › Application deadline is May 15 for the fall semester and October 15 for the spring semester

## *Jacobs Semesters in Mathematics*

**Jacobs Semesters in Mathematics** offers a limited number of study-abroad opportunities for undergraduate students in pure and applied mathematics at Jacobs University, an independent private university in Germany.

The campus of Jacobs University is located in Bremen, Germany, an old Hanseatic seaport with roots dating back more than two thousand years. Modern Bremen is a cultural and commercial center in northern Germany, and a well-connected hub to explore Europe.

Being at Jacobs University means living and studying in an English-speaking environment within a thriving international community.

Classes are typically small, allowing for intense and personal interaction between instructors and students. The program includes the opportunity to study the German language and to get in touch with the different facets of German culture and society.

*Welcome to the Jacobs Experience!*
